Capability Map — Strategy-to-Readiness Lifecycle Area

OSS-layer capability frame for transformation roadmap, derived from **GB921 v25.5**. Service + Resource Domains × Strategy / Capability Management / Business Value Development verticals. **22 stable heat-map anchors** (16 L2 + 6 H5). Sister page: capability-map.md (Operations area, 25 anchors). Phase 3 — 2026-05-12.

SERVICE DOMAIN
GB991 §1.1.1.5

RESOURCE DOMAIN
GB991 §1.1.1.6

STRATEGY MANAGEMENT

1.4.1
Service Strategy Management
Annual and multi-year strategic plans for services and service directions
v24.0 rename
`cap-service-strategy`

Test management strategy
Define test types per business activity; analyze test quality offline
L3 1.4.1.8 + 1.4.1.9
`cap-service-strategy-test`

1.5.1
Resource Strategy Management
Annual and multi-year resource strategies; v25.5 carries AI-readiness guidance
v24.0 rename
`cap-resource-strategy`

Test management strategy
Define test types per business activity; analyze test quality offline
L3 1.5.1.8 + 1.5.1.9
`cap-resource-strategy-test`

CAPABILITY MANAGEMENT

1.4.2
Service Capability Delivery
Plan and deliver new and enhanced service capabilities (project-driven)
`cap-service-capability-delivery`

1.4.12
Service Capacity Management
Plan / forecast / optimize service capacity vs SLA / SLO / SLR
net-new v25.5
`cap-service-capacity`

1.4.16
Service Catalog Planning Management
Design the catalog scheme; define the Service Catalog Specification
net-new v25.5
`cap-service-catalog-planning`

1.4.19
Service Specification Management
Describe / model / analyze service specification artefacts (ongoing maintenance)
net-new v25.5
`cap-service-specification`

1.5.2
Resource Capability Delivery
Deploy new and enhanced technology and resources; logical and physical
`cap-resource-capability-delivery`

1.5.14
Resource Capacity Management
Plan / forecast / optimize resource capacity vs business objectives
net-new v25.5
`cap-resource-capacity`

1.5.18
Resource Catalog Planning Management
Design the catalog scheme; define the Resource Catalog Specification
net-new v25.5
`cap-resource-catalog-planning`

1.5.19
Resource Specification Management
Develop / master / analyze + version Resource Specifications (ongoing maintenance)
net-new v25.5
`cap-resource-specification`

BUSINESS VALUE DEVELOPMENT

1.4.3
Service Specification Lifecycle Management
Project-driven introduction-to-retirement of new service classes; Test catalogue
R20.5 lineage v24.0 rename
`cap-service-specification-lifecycle`

Test catalogue development & retirement
Specify each Service Test (roles, methods, rules, thresholds); composes Resource Test
L3 1.4.3.8 (new in v25.5)
`cap-service-specification-lifecycle-test`

Service end-of-life management
Identify unviable service classes; impacted products / customers; manage exit
L3 1.4.3.7 (narrative-only, 0 L4s)
`cap-service-specification-lifecycle-exit`

1.5.3
Resource Specification Lifecycle Management
Same — with explicit 4-step Exit decomposition (Resource decommissioning is heavier)
R20.5 lineage v24.0 rename
`cap-resource-specification-lifecycle`

Test catalogue development & retirement
Specify each Resource Test; base of cross-PSR test composition stack
L3 1.5.3.8 (new in v25.5)
`cap-resource-specification-lifecycle-test`

Resource end-of-life management
Identify unviable resources; impacted customers; transition strategies; manage exit
L3 1.5.3.7 (4 L4s – PSR-asymmetric depth)
`cap-resource-specification-lifecycle-exit`

1.4.13
Service Catalog Lifecycle Management
Catalog implementation lifecycle: design → build → policy
net-new v25.5
`cap-service-catalog-lifecycle`

1.4.17
Service Anomaly Lifecycle Management
Define / orchestrate / monitor Anomaly Closed Loops (OODA-anchored governance)
net-new v25.5
`cap-service-anomaly-lifecycle`

1.5.15
Resource Catalog Lifecycle Management
Catalog implementation lifecycle: design → build → policy
net-new v25.5
`cap-resource-catalog-lifecycle`

1.5.20
Resource Anomaly Lifecycle Management
Define / orchestrate / monitor Anomaly Closed Loops (OODA-anchored governance)
net-new v25.5
`cap-resource-anomaly-lifecycle`

Legend

L2 capability anchor (16 total)

Cross-Lifecycle composability (links to Operations capability map)

- **3-stage × 2-PSR Test maturity row** — Strategy-test + Lifecycle-test H5s above pair with Operations-side `cap-{service,resource}-support-test` (L3 1.4.4.6 / 1.5.4.9).

H5 sub-capability anchor (6 total — Test ×4, Exit ×2)
Net-new in v25.5 (Original PID = None)
R20.5 lineage (pre-v25 history)
v24.0 rename (provenance noted on source page)

- **Two-L2 Anomaly pattern** — 1.4.17 / 1.5.20 here pair with Operations-side `cap-{service,resource}-anomaly` (1.4.18 / 1.5.21). BVD governs / Operations executes.
- **Four-L2 Catalog lifecycle** — Catalog Planning (1.4.16/1.5.18) + Catalog Lifecycle (1.4.13/1.5.15) here pair with Operations-side `cap-{service,resource}-catalog-{operational-readiness,content}` (1.4.14, 1.4.15, 1.5.16, 1.5.17).
