Capability Map — Operations Lifecycle Area

OSS-layer capability frame for transformation roadmap, derived from **GB921 v25.5**. Service + Resource Domains × OFAB verticals (Operations Readiness & Support / Fulfillment / Assurance / Billing). **25 stable heat-map anchors** (17 L2 + 8 H5). Sister page: capability-map-s2r.html (Strategy-to-Readiness area, 22 anchors). Promoted from draft 2026-05-10; Phase 2 sub-capability review 2026-05-10.

SERVICE DOMAIN
GB991 §1.1.1.5

RESOURCE DOMAIN
GB991 §1.1.1.6

OPERATIONS READINESS & SUPPORT

1.4.4
Service Support Management
Operational substrate for all Service FAB processes
v23.5 / v24.0 renames
`cap-service-support`

Security & risk responsibilities
Vulnerability mgmt, threat assessments, risk assessments + mitigation
L2 responsibilities block (Vulnerability / Threat / Risk)
`cap-service-support-security`

Inventory management
Manage Service Inventory DB + processes; audit; track; identify issues
L3 1.4.4.1 (4 L4s — incl. Audit Tests)
`cap-service-support-inventory`

Test management
Execute end-to-end service tests; orchestrate Product + Resource test composition
L3 1.4.4.6
`cap-service-support-test`

1.4.14
Service Catalog — Operational Readiness
Operate the Service Catalog as a production service
`cap-service-catalog-operational-readiness`

1.4.15
Service Catalog — Content
Manage what's in the published Service Catalog
`cap-service-catalog-content`

1.5.4
Resource Support Management
Operational substrate for all Resource FAB; workforce establishment lives here
v23.5 / v24.0 renames
`cap-resource-support`

Security & risk responsibilities
Vulnerability mgmt, threat assessments, risk assessments + mitigation
L2 responsibilities block
`cap-resource-support-security`

Workforce management (establishment)
Manage field workforce roster, skills, training (establishment side)
L3 1.5.4.8 Manage Field Workforce
`cap-resource-support-workforce`

Inventory management
Manage Resource Inventory DB + processes; track; identify issues
L3 1.5.4.5 (3 L4s — no Audit Tests, asymmetric to Service)
`cap-resource-support-inventory`

Test management
Execute end-to-end resource tests; bottom of cross-PSR test composition
L3 1.5.4.9 (carries OQ-045-family source-text quirk)
`cap-resource-support-test`

1.5.7*
Resource Data Management
Collect / distribute / manage resource data across all OFAB verticals
v23.5 rename | multi-vertical
`cap-resource-data`

1.5.16
Resource Catalog — Operational Readiness
Operate the Resource Catalog as a production service
`cap-resource-catalog-operational-readiness`

1.5.17
Resource Catalog — Content
Manage what's in the published Resource Catalog
`cap-resource-catalog-content`

FULFILLMENT

1.4.5
Service Activation Management
Activate and configure service instances per customer order
v24.0 rename
`cap-service-activation`

1.5.5*
Resource Order Management
Capture / schedule / allocate resource orders; work-order execution
R20.5 rename (Workforce Mgmt → Resource Order) | multi-vertical
`cap-resource-order`

Workforce-related work orders (execution)
Allocate work orders to field workforce per resource order (execution side)
L3 1.5.5.7 Manage Resource Work Order
`cap-resource-order-workforce`

ASSURANCE

1.4.6
Service Problem Management
Restore service; isolate cause of customer-impacting service issues
`cap-service-problem`

1.4.7
Service Performance Management
Monitor / measure / report on service KPIs and SLAs
v23.5 rename (Service Quality Mgmt → Perf)
`cap-service-performance`

1.4.18
Service Anomaly Management
Predict / detect / assess / mitigate anomalies before they become Problems
`cap-service-anomaly`

1.5.8
Resource Trouble Management
Detect / isolate / fix resource faults; convergence for alarms + performance
`cap-resource-trouble`

1.5.9
Resource Performance Management
Monitor / measure / report on resource KPIs
`cap-resource-performance`

1.5.21
Resource Anomaly Management
Predict / detect / assess / mitigate resource anomalies
`cap-resource-anomaly`

BILLING

1.4.8
Service Guiding & Mediation
Pre-billing mediation of service usage events
`cap-service-guiding-and-mediation`

1.5.10
Resource Mediation & Reporting
Pre-billing mediation of resource usage events
`cap-resource-mediation-and-reporting`

Legend

- L2 capability anchor (17 total)
- H5 sub-capability anchor (8 total — security ×2, workforce ×2, inventory ×2, test ×2)
- Renamed in v23.5 / v24.0 / R20.5 (provenance noted on source page)
- Multi-vertical L2 (placed under primary vertical; spans others — see below)

* 1.5.5 Resource Order spans Fulfillment + Operations Readiness & Support; 1.5.7 Resource Data spans all four OFAB verticals. Placed under primary vertical per Session State decisions.

Cross-Lifecycle composability (links to S2R capability map)

- **3-stage × 2-PSR Test maturity row** — Operations-side `cap-{service,resource}-support-test` (1.4.4.6 / 1.5.4.9) pair with S2R-side Strategy-test + Lifecycle-test H5s on the sister page.
- **Two-L2 Anomaly pattern** — 1.4.18 / 1.5.21 here (Operations executes) pair with S2R-side `cap-{service,resource}-anomaly-lifecycle` (1.4.17 / 1.5.20, BVD governs).
- **Four-L2 Catalog lifecycle** — 1.4.14, 1.4.15, 1.5.16, 1.5.17 here (Operational Readiness + Content) pair with S2R-side Catalog Planning (1.4.16/1.5.18) + Catalog Lifecycle (1.4.13/1.5.15).
