Combined Capability Map — TMF eTOM v25.5 OSS Layer

Service + Resource Domains × both Lifecycle Areas (S2R + Operations)
47 stable heat-map anchors total · 33 in-scope L2 process groups · 14 H5 sub-capabilities
Phase 3 final state — 2026-05-12

STRATEGY-TO-READINESS LIFECYCLE AREA

GB991 §1.1.2.1 — what-to-build / how-to-deliver · 16 L2 + 6 H5 = 22 anchors

	SERVICE DOMAIN GB991 §1.1.1.5	RESOURCE DOMAIN GB991 §1.1.1.6

STRATEGY MGMT	**1.4.1**
	Service Strategy Management
	Annual and multi-year strategic plans for services and service directions
	v24.0 rename
	`cap-service-strategy`
	Test management strategy ⇄ Test row
	Define test types per business activity; analyze test quality offline
	L3 1.4.1.8 + 1.4.1.9
	`cap-service-strategy-test`
		1.5.1
		Resource Strategy Management
		Annual and multi-year resource strategies; v25.5 carries AI-readiness guidance
		v24.0 rename
		`cap-resource-strategy`
		Test management strategy ⇄ Test row
		Define test types per business activity; analyze test quality offline
		L3 1.5.1.8 + 1.5.1.9
		`cap-resource-strategy-test`

CAPABILITY MGMT	**1.4.2**
	Service Capability Delivery
	Plan and deliver new and enhanced service capabilities (project-driven)
	`cap-service-capability-delivery`
	
	1.4.12
	Service Capacity Management
	Plan / forecast / optimize service capacity vs SLA / SLO / SLR
	net-new v25.5
	`cap-service-capacity`
	
	1.4.16
	Service Catalog Planning Mgmt
	Design the catalog scheme; define the Service Catalog Specification
	net-new v25.5
	⇄ Catalog 4-L2
	`cap-service-catalog-planning`
	
	1.4.19
	Service Specification Mgmt
	Describe / model / analyze service specification artefacts (ongoing maintenance)
	net-new v25.5
	`cap-service-specification`
		1.5.2
		Resource Capability Delivery
		Deploy new and enhanced technology and resources; logical and physical
		`cap-resource-capability-delivery`
		
		1.5.14
		Resource Capacity Management
		Plan / forecast / optimize resource capacity vs business objectives
		net-new v25.5
		`cap-resource-capacity`
		
		1.5.18
		Resource Catalog Planning Mgmt
		Design the catalog scheme; define the Resource Catalog Specification
		net-new v25.5
		⇄ Catalog 4-L2
		`cap-resource-catalog-planning`
		
		1.5.19
		Resource Specification Mgmt
		Develop / master / analyze + version Resource Specifications (ongoing maintenance)
		net-new v25.5
		`cap-resource-specification`

BUSINESS VALUE DEV.

1.4.3
Service Specification Lifecycle Mgmt
Project-driven introduction-to-retirement of new service classes; Test catalogue

R20.5 lineage | v24.0 rename
`cap-service-specification-lifecycle`

Test catalogue dev & retirement ⇄ Test row
Specify each Service Test (roles, methods, rules, thresholds); composes Resource Test
`L3 1.4.3.8 (new in v25.5)`
`cap-service-specification-lifecycle-test`

Service end-of-life management
Identify unviable service classes; impacted products / customers; manage exit
`L3 1.4.3.7 (narrative-only)`
`cap-service-specification-lifecycle-exit`

1.4.13
Service Catalog Lifecycle Mgmt
Catalog implementation lifecycle: design → build → policy

net-new v25.5
⇄ Catalog 4-L2

`cap-service-catalog-lifecycle`

1.4.17
Service Anomaly Lifecycle Mgmt
Define / orchestrate / monitor Anomaly Closed Loops (OODA-anchored governance)

net-new v25.5
⇄ Anomaly pair
`cap-service-anomaly-lifecycle`

1.5.3
Resource Specification Lifecycle Mgmt
Same — with explicit 4-step Exit decomposition (Resource decommissioning is heavier)

R20.5 lineage | v24.0 rename
`cap-resource-specification-lifecycle`

Test catalogue dev & retirement ⇄ Test row
Specify each Resource Test; base of cross-PSR test composition stack
`L3 1.5.3.8 (new in v25.5)`
`cap-resource-specification-lifecycle-test`

Resource end-of-life management
Identify unviable resources; impacted customers; transition strategies; manage exit
`L3 1.5.3.7 (4 L4s — PSR-asymm)`
`cap-resource-specification-lifecycle-exit`

1.5.15
Resource Catalog Lifecycle Mgmt
Catalog implementation lifecycle: design → build → policy

net-new v25.5
⇄ Catalog 4-L2

`cap-resource-catalog-lifecycle`

1.5.20
Resource Anomaly Lifecycle Mgmt
Define / orchestrate / monitor Anomaly Closed Loops (OODA-anchored governance)

net-new v25.5
⇄ Anomaly pair
`cap-resource-anomaly-lifecycle`

OPERATIONS LIFECYCLE AREA

GB991 §1.1.2.1 — day-to-day customer operations · 17 L2 + 8 H5 = 25 anchors

SERVICE DOMAIN
GB991 §1.1.1.5

RESOURCE DOMAIN
GB991 §1.1.1.6

OPS READINESS & SUPPORT

1.4.4
Service Support Management

Operational substrate for all Service FAB processes

v23.5 / v24.0 renames

`cap-service-support`

Security & risk responsibilities
Vulnerability mgmt, threat assessments, risk assessments + mitigation
`L2 responsibilities block`
`cap-service-support-security`

Inventory management
Manage Service Inventory DB + processes; audit; track; identify issues
`L3 1.4.4.1 (4 L4s)`
`cap-service-support-inventory`

Test management ⇄ Test row
Execute end-to-end service tests; orchestrate Product + Resource test composition
`L3 1.4.4.6`
`cap-service-support-test`

1.4.14
Service Catalog — Operational Readiness

Operate the Service Catalog as a production service

⇄ Catalog 4-L2

`cap-service-catalog-operational-readiness`

1.4.15
Service Catalog — Content

Manage what's in the published Service Catalog

⇄ Catalog 4-L2

`cap-service-catalog-content`

1.5.4
Resource Support Management

Operational substrate for all Resource FAB; workforce establishment lives here

v23.5 / v24.0 renames

`cap-resource-support`

Security & risk responsibilities
Vulnerability mgmt, threat assessments, risk assessments + mitigation
`L2 responsibilities block`
`cap-resource-support-security`

Workforce management (establishment)
Manage field workforce roster, skills, training (establishment side)
`L3 1.5.4.8 Manage Field Workforce`
`cap-resource-support-workforce`

Inventory management
Manage Resource Inventory DB + processes; track; identify issues
`L3 1.5.4.5 (3 L4s – PSR-asymm)`
`cap-resource-support-inventory`

Test management ⇄ Test row
Execute end-to-end resource tests; bottom of cross-PSR test composition
`L3 1.5.4.9`
`cap-resource-support-test`

1.5.7*
Resource Data Management

Collect / distribute / manage resource data across all OFAB verticals

v23.5 rename
multi-vertical

`cap-resource-data`

1.5.16
Resource Catalog — Operational Readiness

Operate the Resource Catalog as a production service

⇄ Catalog 4-L2

`cap-resource-catalog-operational-readiness`

1.5.17
Resource Catalog — Content

Manage what's in the published Resource Catalog

⇄ Catalog 4-L2

`cap-resource-catalog-content`

FULFILLMENT

1.4.5
Service Activation Management

Activate and configure service instances per customer order

v24.0 rename

`cap-service-activation`

1.5.5*
Resource Order Management

Capture / schedule / allocate resource orders; work-order execution

R20.5 rename
multi-vertical

`cap-resource-order`

Workforce-related work orders (execution)
Allocate work orders to field workforce per resource order (execution side)
`L3 1.5.5.7 Manage Resource Work Order`
`cap-resource-order-workforce`

ASSURANCE

1.4.6
Service Problem Management
Restore service; isolate cause of customer-impacting service issues

`cap-service-problem`

1.4.7
Service Performance Management
Monitor / measure / report on service KPIs and SLAs

v23.5 rename
`cap-service-performance`

1.4.18
Service Anomaly Management
Predict / detect / assess / mitigate anomalies before they become Problems

⇄ Anomaly pair
`cap-service-anomaly`

1.5.8
Resource Trouble Management
Detect / isolate / fix resource faults; convergence for alarms + performance

`cap-resource-trouble`

1.5.9
Resource Performance Management
Monitor / measure / report on resource KPIs

`cap-resource-performance`

1.5.21
Resource Anomaly Management
Predict / detect / assess / mitigate resource anomalies

⇄ Anomaly pair
`cap-resource-anomaly`

BILLING

1.4.8
Service Guiding & Mediation
Pre-billing mediation of service usage events

`cap-service-guiding-and-mediation`

1.5.10
Resource Mediation & Reporting
Pre-billing mediation of resource usage events

`cap-resource-mediation-and-reporting`

Legend

- L2 capability anchor — S2R area (16)
- L2 capability anchor — Operations area (17)
- H5 sub-capability (14 total — Test ×6, Exit ×2, Security ×2, Workforce ×2, Inventory ×2)
- Net-new in v25.5 (Original PID = None)
- R20.5 lineage
- Renamed in v23.5 / v24.0 / R20.5
- Multi-vertical L2 (placed under primary vertical)

* 1.5.5 spans Fulfillment + ORS; 1.5.7 spans all four OFAB verticals.

Cross-Lifecycle composability — three patterns

- **3-stage × 2-PSR Test maturity row** — six cells marked ⇄ Test row form a 6-cell heat-map row spanning Strategy → Lifecycle → Operations × Service / Resource. Strongest cross-Lifecycle composability story.
- **Two-L2 Anomaly pattern** — cells marked ⇄ Anomaly pair. BVD governs (1.4.17 / 1.5.20: closed-loop lifecycle); Operations executes (1.4.18 / 1.5.21: predict / detect / assess / mitigate / learn).
- **Four-L2 Catalog lifecycle** — cells marked ⇄ Catalog 4-L2. Spans Capability Mgmt (Planning) → BVD (Lifecycle) → ORS (Operational Readiness + Content) on each PSR side. Eight catalog anchors across both halves.

Inventory totals

S2R L2 anchors	16
S2R H5 anchors	6
Operations L2 anchors	17
Operations H5 anchors	8
Total stable heat-map anchors	**47**

Source: `wiki/views/capability-map.md` + `wiki/views/capability-map-s2r.md`. Both view pages share `cap-<layer>-<kebab-name>` anchor convention. Practitioner overlay file in `project/` (security boundary — Claude does not read) wikilinks these anchors.
